
[Maritime Launch Services – Launch Facility Construction Information Session](#)

Maritime Launch Services, headquartered in Halifax, Nova Scotia, is developing and will be operating Canada's first commercial rocket launch facility. This facility will be located near Canso, Nova Scotia, and will be used to deliver satellites into low earth orbit.

On October 6th, 2021, we will be hosting an **industry information session** to provide interested companies with an overview of the project, an update regarding progress to date, and an outlook regarding the scope and timing related to the construction of the project. After the presentations, we will be pleased to take questions from the audience.

Joining us at this event will be our construction management partner, Lindsay Construction.

The event will take place at the Chedabucto Lifestyle Complex, 60 Green Street, Guysborough, on October 6th, from 10:30am to 12:00pm.

As the first launch facility in Canada, we plan to conduct our initial launch late in 2023. This project will be a historic move for Canada as we will join a small group of countries with launch capabilities.

This is your opportunity to learn more about this exciting project and what opportunities are available for your business.

We look forward to seeing you there.

Due to current COVID-19 related restrictions, occupancy is limited to 125 people.

To ensure your access to the event please send an email to info@maritimelaunch.com indicating that will be attending which also includes your name and company name.

At the event we will be asking you to sign in for contact tracing purposes.

As per Nova Scotia COVID guidelines, proof of COVID-19 vaccination will also be required at the door. We will not be able to admit people who cannot provide proof of COVID-19 vaccination.

If you have any questions, please send an email to info@maritimelaunch.com
