

Allison Coffin

Eastward Energy

Allison Coffin is the Director, Regulatory & Government Relations at Eastward Energy in Nova Scotia. In her almost twenty years with the company, she has previously led the Sales, Engineering and Construction teams and has a strong background in capital plan execution through design, standards and installation of natural gas infrastructure throughout the province.

Allison has an interest in standardizing methods and lowering costs of installation through best practices, which led to her involvement in the creation of the Canadian Gas Association Joint Utility Trenching Task Force in 2020.

Allison has an undergraduate degree in Chemical Engineering from Dalhousie University and a Masters degree in Business Administration from Saint Mary's University. She is a Board member at CANS and chair of the Workforce Development Committee and is Vice-Chair of the Canadian Standards Technical Sub-Committee on Distribution.

Outside of the workplace you will find her traveling, hiking, biking, teaching yoga and spending time with her partner and young daughter.
